

COMPANY PROFILE

Rosstroytech® is a leading Russian manufacturer of industrial and custom automatic welding machines, wire and rebar processing products.

We specialized in a high-tech welding equipment, including multi spot resistance welding machines, 3D fence factory, coil mesh machines, reinforcement cages and frames units, straightening and cutting machines, etc. Find more in online [catalogue](#).

Our production cycle is well-resourced with the most-modern machinery and the cutting-edge technology that enables us to complete orders within the committed period of time.

Rosstroytech® keys to success:

- Low-cost machines and high production output
- Qualified equipment assembly
- World branded components
- Worldwide shipping
- Aftersale qualified support

We have a good reputation locally. Rosstroytech® company and its equipment are recommended as the most reliable and technically efficient by the governmental authorities, industrial enterprises and private business managers in Russia. Over 1000 successful supplies every year, more than in 100 cities.

We are growing up every year, benefiting the state and society, namely: creating new jobs, producing advanced equipment and improving the welfare of people.

AUTOMATIC WELDING MACHINE WF SERIES FOR HEAVY REBAR MESH

WF series multi spot welding machine is designed for heavy mesh wire production diameter from 4 to 12 mm. High efficiency of WF series machine allows to produce up to 29 tons per shift of reinforcing mesh in bulk.

SEMI-AUTOMATIC WELDING MACHINE WPD SERIES

Step welding WPD series machine is designed for heavy flat cages production. Flat reinforcement cages used in various precast concrete products of the construction and concrete industry.

PILE CAGE WELDING MACHINE WS SERIES

WS series pile cage welding machines are designed for reinforcement square pile and cage production. WS series technology is based on the winding of a continuous uncoiled wire spiral around the longitudinal rebars while the welding heads moves along the wire.

ROSSTROYTECH® DEALERSHIP MEMBER

We offer long-term mutually beneficial cooperation to promote low-cost welding machinery with a high production output satisfying customers' specific requirements, and combine the superior quality, top reliability and longevity.

New opportunity to grow up your profits becoming a representative of Rosstroytech®. Some advantages of being Rosstroytech® dealer:

Price benefits

- Convenient and flexible system of discounts for all products supplied
- Good margin on every machines being sold in your region
- Marginal benefit is also on direct inquiry form your territory

Technical & Training support

- Availability of all manuals (installation, operational and maintenance manual)
- Staff training and consulting
- Aftersale technical support & spare parts supply

Marketing support

- Guidelines for product line combination
- Product benefits consulting

Research & Development

- Updated manuals
- Latest technology
- Competitive strategy development

STRAIGHTENING & CUTTING MACHINE CTU-60/6-12

Straightening and cutting machine automatically unwinds reinforcing steel from the coil and cut the bars to size. Operating diameter 6-12 mm.

STRAIGHTENING & CUTTING MACHINE CTU-70/3-6

Straightening and cutting machine automatically unwinds wire from the coil and cut the bars to size. Operating diameter 3-6 mm.

AUTOMATIC WELDING MACHINE WL SERIES

Full automatic multi spot welding machine WL series has a line and cross wire coils, high-speed performance about 6.5 tons per shift. WL series machine is designed for mass regular mesh production, and oriented for large mesh manufacturers.

SEMI-AUTOMATIC WELDING MACHINE WP SERIES

Semi-automatic multi spot welding machine WP series has a great performance, about 5 tons output per shift, and inspired competitive characteristics. WP series machines provide average production volumes of various diameters wire mesh, intended for own use and sale.
